PROJECTS

Save a Plate | save-a-plate.herokuapp.com | github.com/jerquinigo/SaveAPlate

Full stack web application created to reduce food waste and hunger in New York City

- Designed and developed various components including Search, Login/Signup Form, Feed, About Us
- Presented a demo at the Museum of the Moving Image to an audience and panel of tech veterans (250+ seats)
- Created design documents, wireframes, and wiki
- Utilized Trello for project management by creating tickets with severity/priority
- React | Redux | Material-UI | Node | Express | PostgreSQL | SQL | HTML | CSS | JavaScript

Recipe Pals | recipepals.herokuapp.com | Private Repo

Platform for users to share recipes, view profiles, write comments, and more

- Created a reusable SEO component that uses Open Graph protocol and generates meta tags using react-helmet-async
- Built a Comments component for users to add/edit/delete comments using React Hooks and GraphQL mutations
- React | Redux | Bootstrap | MongoDB | GraphQL | Node | Express | HTML | CSS | JavaScript

Scare the Crow | scarethecrow.netlify.com | github.com/Andrew-Kil/scare-the-crow

Word guessing game that stores the users settings and high score using Local Storage

- Implemented a fully responsive and mobile friendly design using SASS/SCSS, CSS Flexbox and media queries
- React | SASS/SCSS | Local Storage | HTML | CSS | JavaScript

SKILLS

JavaScript | React | Redux | HTML5 | CSS3 | SASS/SCSS | Bootstrap | Material-UI | Next.js | Firebase | Node.js
| Express | SQL | PostgreSQL | RESTful APIs | Search Engine Optimization (SEO) | Git | GitHub | JIRA | Trello
