Andrew Kil

Software Engineer

kil.andrew@gmail.com | github.com/andrew-kil | linkedin.com/in/andrew-kil | 929-522-8582

EXPERIENCE

Nomad Reservations

Software Engineer | Remote | October 2020 - Present

Built software for Nomad Reservations, a startup that focuses on improving the outdoor hospitality industry by providing services including a property management system, trip planner, and campground bookings

- Created components for the POS (point of sale) system including dropdown filters and payment options to improve the functionality and user experience for campground employees using Angular, Storybook, Tailwind, and Cypress
- Built the functionality to modify vehicle information that is used to display and print parking passes for guests

WorkSchool

Software Engineer Intern | Remote | August 2020 - October 2020

Built software for WorkSchool, an EdTech startup that allows users to browse online courses and jobs

- Update and redesign previous website by creating various user-facing components for the WorkSchool website including Course Description, Courses Filter, Sign In, Sign Up, Navigation Bar, and Footer
- Collaborated with a team of managers, designers, and developers to create and maintain solutions in an Agile way leveraging the use of tools such as GitHub and Trello

PROJECTS

Save a Plate

save-a-plate.herokuapp.com | github.com/Andrew-Kil/SaveAPlate

- Full stack web application created to reduce food waste and hunger in New York City

Scare the Crow

scarethecrow.netlify.app | github.com/Andrew-Kil/scare-the-crow

- Hangman game that displays a random word for the user to solve within a certain number of guesses
